

CVT IMPLEMENT DRIVE

For Agricultural implement applications.

COMPLETE POWERTRAIN SOLUTIONS

A CVT TRANSMISSION BRINGING BENEFITS IN ALL CONDITIONS

Increased Efficiency, Productivity and Fuel Savings

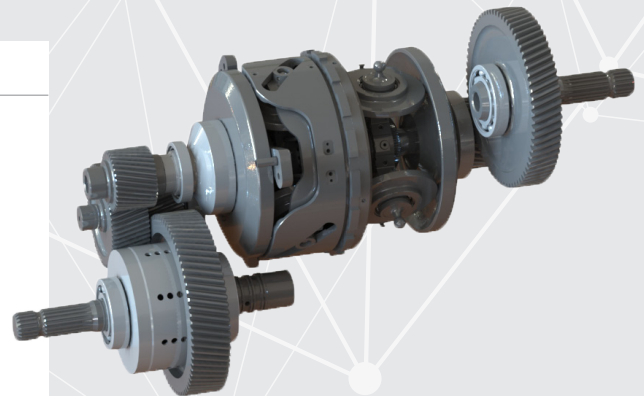

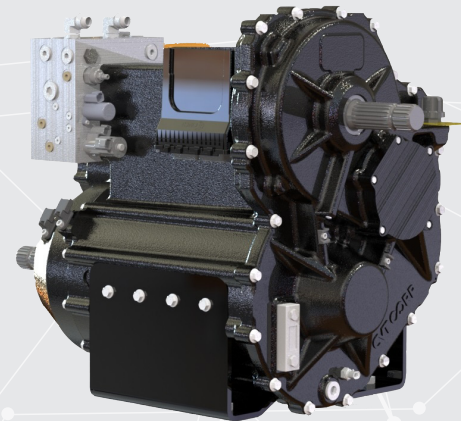

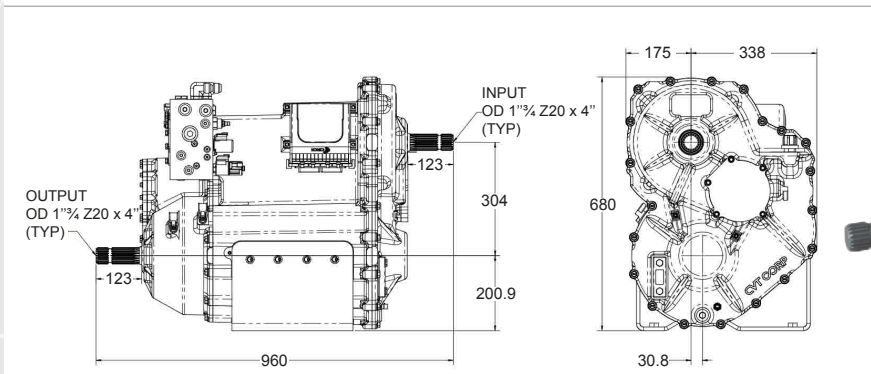

- ∞ Ease start-up and drive while you mix
- ∞ Increased reliability due to the internal wet clutch
- ∞ Automatic shift under load with infinite number of ratios resulting in improved implement performance
- ∞ Smaller tractor due to fully mechanical CVT: maximizing productivity and system efficiency
- ∞ Ease of Use

General Ratings

Power Rating (kW)	150 @ 1000 rpm {75 @ 540 rpm}
Input Speed (rpm)	1000 {540}
Input Torque (N*m)	1427
Output Speed (rpm)	233 to 1200
Output Torque (N*m)	1220 (2400 peak) {610 (1200 peak)}
Range of Ratios	4.29 to 0.82 (span of 5.23)

* Can be customized based on your needs.
