

## **CVTCORP SIGNS THEIR SECOND DISTRIBUTOR/SERVICE DEALER TO SUPPORT PRODUCTS WHEN THEY HIT THE MARKET IN 2017.**

Montreal, Quebec --(BUSINESS WIRE)—Jan 19, 2017— CVTCORP, a world leader in advanced engineering, design and manufacture of mechanical continuously variable transmissions (mCVT) has signed a Distributor and Service agreement with The Gear Centre Off Highway Division in Edmonton, Alberta, to represent them in Canada.

With the anticipated production launch in 2017 of the mCVT products in Off-Highway, Ag and Industrial markets, CVTCORP is gearing up to make sure their customers and end users will have the support that they expect. The Gear Centre will support all service and warranty activities for CVTCORP products and will also work to distribute some defined products in key market areas.

The Gear Centre Group: From its humble beginnings as a small service shop in Edmonton, Alberta, in 1975, The Gear Centre has evolved over the years to become Canada's leading powertrain parts & service provider for the automotive, heavy truck and off-highway industries. The Gear Centre Group of Companies currently includes 5 operating divisions: The Gear Centre Truck & Auto, The Gear Centre Off-Highway, Hydra Steer, Pat's Driveline and Pat's Driveline Industrial. Together the divisions can offer a wide variety of powertrain, driveline and steering expertise for many applications including automotive, 4x4, medium duty, heavy truck and off-highway equipment.

Headquartered in Edmonton, Alberta, The Gear Centre Group includes 30 parts & service centres, 3 distribution warehouses and over 150 parts specialists and service technicians across Canada. We are continually expanding our product lines and technical capabilities to ensure our customers receive superior product quality, service and expertise.

Daniel Girard, CVTCORP CEO and founder said: "CVTCORP is excited to work with The Gear Centre Group in support of our products in the Canadian Market. Their 30 parts & service centres in Canada and knowledgeable workforce will ensure our customer base will have access to the best in class after sales support."

### **About CVTCORP**

Founded in 2001, CVTCORP is an international technology company specializing in Continuously Variable Transmissions (CVTs). The company develops, manufactures and supplies CVTs for construction, agricultural and power generation markets. The infinite number of ratios provided by the transmission enables the equipment to do more work with less fuel. At the same time, the technology offers a cost-effective solution for vehicles and equipment outfitted with their innovative products. The company is privately held and headquartered outside of Montreal, Canada. For more information about CVTCORP please visit us at [www.cvtcorp.com](http://www.cvtcorp.com).
