

CVTCORP Extends Product Portfolio into Gas Compression Industry through Development Agreement with Moore Fans

Montreal, Quebec --(BUSINESS WIRE)—January 12th, 2016--CVTCORP, a worldwide leader in advanced engineering and the design and manufacture of mechanical continuously variable transmissions (mCVT), announced a development agreement with Moore Fans LLC of Marceline, MO. This new development program includes the design, manufacture and service of mechanical CVT transmissions for Moore Fan to sell into the industrial engine –driven gas compression industry.

“This new development program is another chapter in the continued development of mechanical CVT’s into multiple applications in different industries”, said Daniel Girard, President and CEO of CVTCORP. “Our development with Moore Fans will allow us to expand the benefits of our technology into an industry that runs 24/7/365. The ability to offer energy savings through system optimization will be key in an industry that has not seen innovation like this for a number of years.”

John Moore, President of Moore Fan said, “The addition of this technology to this industry is important since the gas compression industry is looking for cost effective products that save energy through fuel efficiency and reduce seasonal system maintenance. The environmental impact of less fuel, lower system noise levels and lower CO₂ emissions only makes this impact that much greater.”

About Moore Fans:

Moore Fans has a 75 year history as a leader in providing key components and engineering support in the gas compression industry. Their key relationships and expertise in this industry will expand the reach and expand the acceptance of mechanical CVT technology into these key markets.

About CVTCORP:

Founded in 2001, CVTCORP is the industry leader in the design, development and manufacture of mechanical continuously variable transmissions for the agriculture, construction, power generation and various other industrial applications. CVTCORP excels at end to end complex efficient and cost effective powertrain solutions for key manufacturers around the world. The company is privately held and headquartered outside of Montreal, Canada. For more information about CVTCORP please visit us at CVTCORP.com.
