

CVTCORP LAUNCHES REDESIGNED WEBSITE!

Sainte-Julie, October 26th, 2016 – CVTCORP is delighted to launch its newly re-designed website! The new web interface allows users to find the related information regarding the company and its unique technology, thanks to the abundant pictures, schematics and videos. You can find CVTCORP at www.cvtcorp.com.

Daniel Girard, CEO and Founder of CVTCORP, said: "For CVTCORP, it was important that the new website allows us to better communicate who we are and to describe the benefits of our technology as it relates to the targeted markets we will service. Indeed, with the new website design, user will more easily find a lot of information on our company and technology."

The new website shows a clear and refined look that allows for simple and fast navigation. Pictures and videos speak for themselves, explaining the CVTCORP technology with insight into the markets being targeted. A visit to the website is a must!

About CVTCORP

Founded in 2001, CVTCORP is an international technology company specializing in mechanical Continuously Variable Transmissions (CVTs). The company develops, manufactures and supplies CVTs for the construction, agricultural and industrial equipment markets. The infinite number of ratios provided by the transmission enables the equipment to do more work with less fuel. At the same time, the technology offers a cost-effective solution for vehicles and equipment outfitted with their innovative products. The company is privately held and headquartered outside of Montreal, Canada. For more information about CVTCORP visit www.cvtcorp.com.
